READY, SET, GO!

Since tastes differ, Perpedes therapeutic shoes offer something for every customer in terms of closure. With all types of closure, it is possible to put on and take off the shoes quickly and easily. Therapy shoes with the innovative BOA® Fit System even allow almost barrier-free entry.

ZIPPER

Two laterally placed zippers provide a particularly wide and easy entry. With additional lacing for width adjustment and the optical effect.

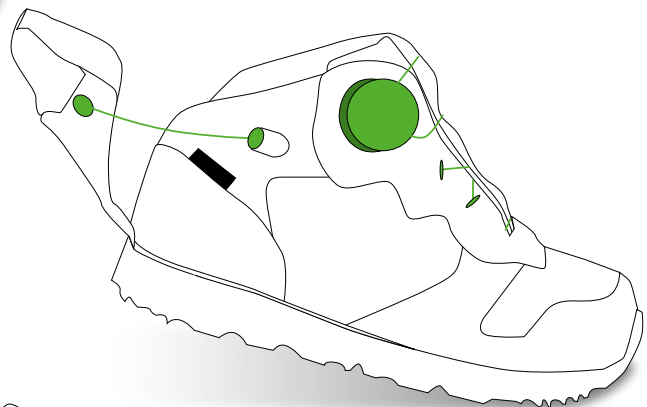

VELCRO CLOSURE

Our therapeutic shoes with velcro closure are the ideal solution for motor impairments: Easy to grip and quick and wide to open or close.

BOA® FIT SYSTEM

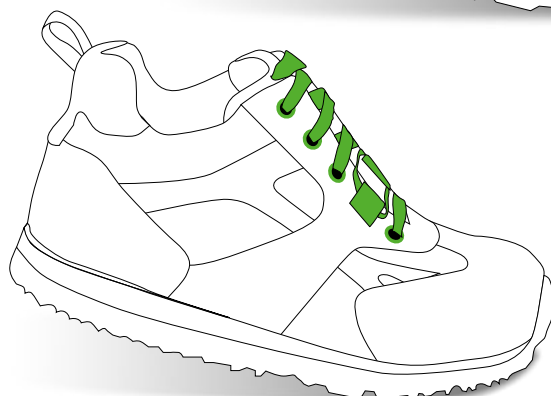

Innovative and proven: The wide opening with rear entry means you're ready to go right away and can concentrate on the important things in life.

Details on page 58.

LACING

Our classic lace-ups can be easily and creatively adapted to individual outfits with your own laces.

BOA®

BOA® FIT SYSTEM ADVANTAGES

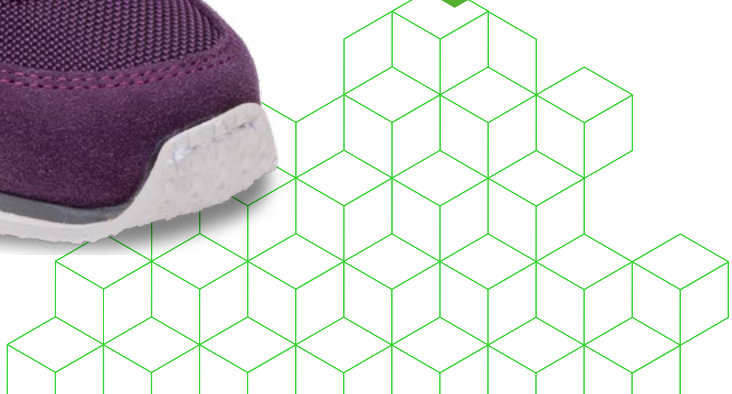

- One-handed operation
- Allows you to get your shoe on and off fast
- Instant micro-adjustments for a precise and custom fit
- Secure fit thanks to an even spread of tension across the laces
- More weather resistant than e.g. hook-and-loop fasteners
- Long-lasting thanks to high quality materials

BOA SNEAKERS

Shoehorns and laces are too traditional for you? Then try the innovative Boa® Fit System and the wide rear opening – you are immediately good to go and can focus on the important things in life. Our extensive range of products includes sneakers in a variety of material and color combinations – some of them will surely fit your taste.

(Inner shoe) Template dimensions

Perpedes' therapy shoes already include a length allowance of 1.2 - 1.5 cm. You only measure the foot length and read the corresponding shoe size.

Proper inner shoe length / proper shoe size = foot length in cm + allowance (1.2 - 1.5 cm)

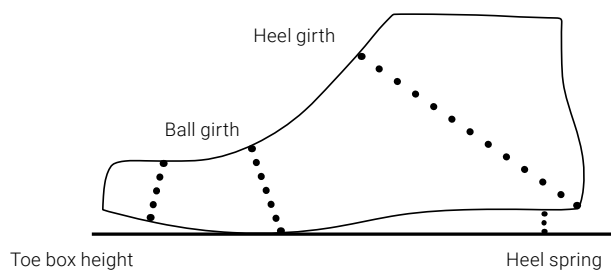

EXAMPLE:

Measured foot length of 21.8 cm + allowance = 23.4 cm.
Our recommendation: size 35

All measurements in cm. (Exception: shoe size)

Perpedes' therapy shoes already include a length allowance of 1.2 – 1.5 cm. You only measure the foot length and read the corresponding shoe size.

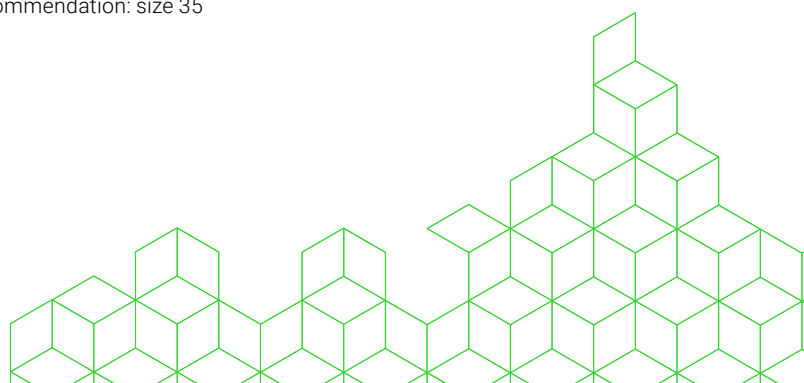

Proper inner shoe length / proper shoe size
= foot length in cm + allowance (1.2 – 1.5 cm)

EXAMPLE:

Measured foot length of 21.8 cm + allowance = 23.4 cm.
Our recommendation: size 35

- *OT = AFOs/DAFOs
- *NS = Normal shoes
- *AV = Antivarus shoes

All measurements in cm. (Exception: shoe size)

»EXTRALIGHT®« ON THE ROAD

Many of the Perpedes therapy shoes are equipped with an **EXTRALIGHT® outsole**, which is optimally adapted to the Perpedes width system. This significantly increases the quality of care for your patients when wearing an orthosis.

The EXTRALIGHT® outsole provides **good dynamics in the rollover** and **high flexibility in the forefoot** to support the orthosis.

EXTRALIGHT® primarily stands for good energy absorption as well as return. The outsole cushions the steps of the patient. It thus provides **pressure relief** and an excellent walking experience.

The innovative EXTRALIGHT® material used for our outsole is also **exceptionally light**. It lowers the overall weight of the Perpedes therapy shoes. Ideal for increasing the dynamics of patients.

Our shoes with white EXTRALIGHT® soles do not cause abrasion on floors - our sneakers in sporty designs are therefore also perfect as indoor shoes.

EXTRALIGHT® also withstands extreme temperatures and conditions, making it **wear-resistant and durable** in normal everyday use. Even under continuous stress, it retains its cushioning properties and remains elastic, which guarantees a good heel-to-toe movement. The perfect basis for our Perpedes therapy shoes.

SOLES FOR OPTIMAL GRIP

The outsole is the basis of every shoe, protects the foot and is the most important ground beneath our feet. Discover which outsoles are used for Perpedes' therapy shoes and what makes them so

unique. Once in advance, all outsoles offer a large surface for increased gait stability and are designed to ensure a natural heel-to-toe movement.

RUBBER SOLE - THE STURDY ONE

- Short: TR-Sole
- High slip resistance due to a deep sole profile
- Low wear due to high abrasion resistance
- Lighter than comparable soles made of rubber

SOLE PROFILE UP TO **SIZE 39** FOR STYLE **KINGSTON, TORONTO AND ONTARIO**

EVA RUBBER SOLE - THE DYNAMIC

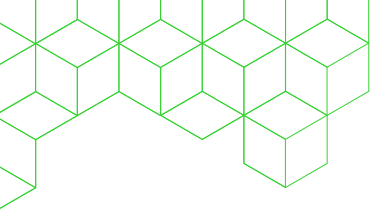

- Excellent grip
- High flexibility in the forefoot area
- Durable due to high abrasion resistance
- High stability in the rear area

SOLE PROFILE UP TO **SIZE 40** FOR STYLE **KINGSTON, TORONTO AND ONTARIO**

NEW

PERPEDES WINTER SOLE – THE SAFE ONE

- Non-slip rubber soles with integrated EVA-wedge
- High slip resistance
- Individual adjustments possible
- Low wear due to high abrasion resistance

SAWTOOTH-SOLE – THE RELIABLE ONE

- Non-slip rubber soles with integrated EVA-wedge
- High slip resistance due to a well defined sole profile
- Low wear due to high abrasion resistance
- Individual adjustments possible

CILINDRETTI SOLE – THE SPECIAL ONE

- Rubber soles with integrated EVA-wedge
- Individual adjustments possible

PERPEDES EXTRALIGHT® – THE LIGHTWEIGHT

- Lightweight and highly slip resistant
- High flexibility and good shock absorption
- Very good pressure relief
- Low wear due to high abrasion resistance
- Individual adjustments possible
- White sole: Non-marking, hence suitable for gym floors

ALSO AVAILABLE AS AN ACCESSORY

EVA SOLE – THE FAMILIAR ONE

- Shock absorbent properties
- Durable and long-lasting
